

HOW TO USE HAL LEONARD ONLINE AUDIO

Because of the changing use of media, and the fact that fewer people are using CDs, we have made a shift to companion audio accessible online. In many cases, rather than a book with CD, we now have a book with an access code for online audio, including performances, accompaniments or diction lessons. Each copy of each book has a unique access code. We call this Hal Leonard created system "My Library." It's simple to use.

Go to www.halleonard.com/mylibrary and enter the unique access code found on page one of a relevant book/audio package.

The audio tracks can be streamed or downloaded. If you download the tracks on your computer, you can add

the files to a CD or to your digital music library, and use them anywhere without being online. See below for comments about Apple and Android mobile devices.

There are some great benefits to the My Library system. **Playback+** is exclusive to Hal Leonard, and when connected to the Internet with this multi-functional audio player you can:

- Change tempo without changing pitch
- Transpose to any key

Optionally, you can create a My Library account, and store all the companion audio you have purchased there. Access your account online at any time, from any device, by logging into your account at www.halleonard.com/mylibrary. Technical help may be found at www.halleonard.com/mylibrary/help/

Apple/iOS

Question: On my iPad and iPhone, the Download links just open another browser tab and play the track. How come this doesn't really download?

Answer: The Safari iOS browser will not allow you to download audio files directly in iTunes or other apps. There are several ways to work around this:

- You can download normally on your desktop computer, saving the files to iTunes. Then, you can sync your iOS device directly to your computer, or sync your iTunes content using an iCloud account.
- There are many third-party apps which allow you to download files from websites into the app's own file manager for easy retrieval and playback.

Android

Files are always downloaded to the same location, which is a folder usually called "Downloads" (this may vary slightly depending on what browser is used (Chrome, Firefox, etc)). Chrome uses a system app called "Downloads" where files can be accessed at any time. Firefox and some other browsers store downloaded files within a "Downloads" folder in the browser itself.

Recently-downloaded files can be accessed from the Notification bar; swiping down will show the downloaded files as a new "card", which you tap on to open. Opening a file depends on what apps are installed on the Android device. Audio files are opened in the device's default audio app. If a file type does not have a default app assigned to it, the Android system alerts the user.

Do-Re-Mi

Lyrics by Oscar Hammerstein II
Music by Richard Rodgers

Allegretto

The musical score is arranged for Cello and Piano. The tempo is marked 'Allegretto' and the time signature is 2/4. The piano part features a continuous eighth-note accompaniment in the right hand and a bass line in the left hand. The cello part begins with a rest for the first four measures, then enters in measure 5 with a half note 'Do' (C2), followed by quarter notes 'Re' (D2) and 'Mi' (E2) in measures 6 and 7 respectively. The score is divided into four systems, with measure numbers 6, 12, and 17 indicated at the beginning of the first, second, and third systems respectively. The piano part is marked 'p legato'.
